Mechanized Irrigation Solutions for Global Agriculture

Web Based Solutions to Increase Yields and

Beginning in 2007, Pierce engineers pushed the reset button. Manual forms of control and monitoring were transformed with the introduction of the Pierce Evolution Series, bringing the digital age to mechanized irrigation and sweeping aside more conventional forms of human/machine interface.

Today, with the use of advanced browser technology, Pierce continues transforming the virtual and physical landscape of large-scale farming, developing hands-free control and monitoring solutions.

- > **EvoTouch™** Control Panels
- > **FieldView™** Farm Management
- > **PivotLink™** Panel Adapters

Integrating off-the-shelf SCADA (Supervisory Control and Data Access) software has allowed farm managers - through the use of standard computer equipment and smart devices - to easily position, control and start/stop equipment and access data from remote locations.

EvoTouch™

Web Enabled Solutions

EvoTouch™ Control Panel

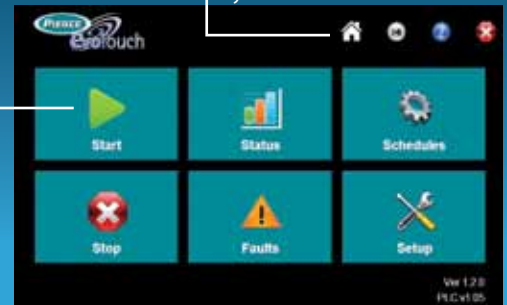

- Daylight Readable Touch Screen (shown enlarged in photo at right)
- Manual Start and Direction Switches
Capable of operating without the Computer in Manual Mode
- Safety Override Button

The EvoTouch™ system panel places direct, web-based control at your fingertips. Housed in a Nema 3X stainless enclosure with built-in WI-FI access, the newest in our series of Programmable Panels utilizes the latest in high resolution touch screens.

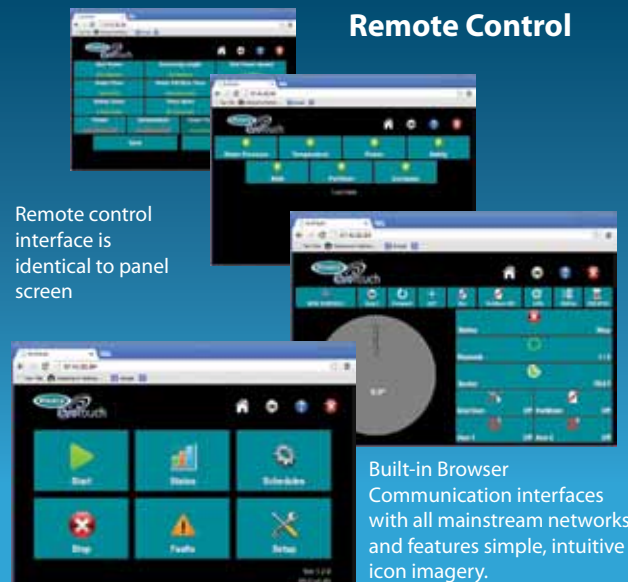

Evolution Touch Screen

Home Menu
Touch Pad

Internet Browser
Style Controls

Remote Control

Remote control interface is identical to panel screen

Built-in Browser Communication interfaces with all mainstream networks and features simple, intuitive icon imagery.

Transforming Digital Commu

Profitability, Optimize Productivity and Better Manage Resources

FieldView™

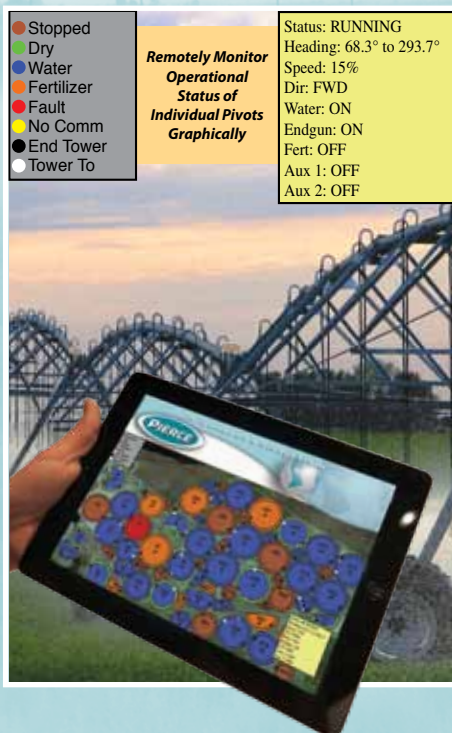

Sample FieldView™ browser image

Imagine an overview of your entire farm at a glance!

That's the benefit of Pierce FieldView™. Developed to integrate with EvoTouch™ or PivotLink™, FieldView™ provides the freedom to control and monitor the primary functions of any pivot within your network from home, office, or the seat of your pickup using any wireless smart device.

- > Capable of retrieving operating data from up to 150 machines in 30 seconds
- > Constant data access and control via a standard computer or smart device.
- > One-time, nominal charge with no licensing or annual fees

PIVOTLINK™ SYSTEM

Weather resistant,
Industrial-grade
construction

Pierce engineers have designed a user-friendly adapter panel allowing PivotLink™ to seamlessly interface, using standardized browser technology, with systems from various manufacturers!

- > Upgrade ANY existing Control Panel
- > Standardized interface allows systems from various manufacturers to link with your farm network
- > Easy-to-install

Communication into Effective Tools for Irrigation

Options and Enhanced Solutions

Electronic Compass

Attaches directly to the span and is accurate to 1.0° and repeatable to 0.5°.

40' Tower Wi-Fi Access Point

Vehicle Wi-Fi Hot Spot

Allows more powerful Wi-Fi radios to boost signal of smaller Wi-Fi devices so they can connect to your Farm Network.

What Our Customers Think...

"We installed our EvoTouch system this season and our farm managers are very pleased with the performance. Each unit is sturdy, responsive, and doubtless will save us money."

We invite you to find out more about Pierce-built quality by contacting your nearest Pierce dealer or visiting us online.
